THE WORLD OVER

J. MACHRAY GETS SEVEN YEARS

VERGIN'S FRIENDS ASK PARDON

3000-YEAR OLD PEAS GROW WELL

YOU CAN'T SLEEP IN SASKIN

The doors of Stony Mountain penitentiary closed shut last Thursday behind the frail form of John A. Machray, K.C., the 47-year old lawyer, for years a trusted confidant of the endowment funds of the University of Manitoba and the Church of England, when he began serving a seven-year term on two charges of theft. Machray pleaded guilty in provincial police court to theft of \$500.00 from the university and \$100.00 from a former law partner. He waived his right to appeal and left immediately for the penitentiary.

Magistrate Niosi, a friend of Machray for more than twenty-five years, sentenced the man to his prison term.

Two petitions have been circulated among the friends of Peter Veregin, leader of the Dookhshoer in Canada, asking that their leader be saved from the penalty of deportation. These petitions will be presented to His Excellency, the Earl of Dookhshoer, governor-general of Canada, immediately. The followers of the Dookhshoer leader contend that should Veregin be deported he would be sentenced to death, presumably on a charge of being a traitor to his country.

STOCKHOLM—Peas, after resting for some 3000 years in the tomb of Tutankhamen in Egypt, have grown and are now yielding crops in a little garden in Annopolis, on the Swedish south coast. A Danish professor while visiting part in the famous excavation of the tomb of "King Tut" brought home a few peas found in the tomb. The peas grew and gave a crop of a few peas in 1930. Two of these were given to a retired farmer and when planted yielded 200 peas.

Saskatchewan residents who have difficulty in waking up at an early hour have had their problem solved for them. The provincial government through its telephone system, has inaugurated a call system, whereby any one who wishes may be called by the operator at a certain hour in the morning. The Saskatchewan government telephone is the first system to install this service in Canada. A similar service has been in operation in Mar-

seille, France, for several years and has proved successful. It is stated.

The man who doesn't build castles in the air doesn't build any with bricks.

is pure, clean crepe paper, made under sanitary conditions.

HON. R. G. REID,
Provincial Treasurer

EDMONTON, Sept. 26.—The by-election in the Carleton provincial constituency to fill the vacancy caused by the death of Mr. J. H. Macdonald, M.P., will be held on Tuesday, October 29th, according to an announcement made by Premier J. E. Brownlee on Wednesday. Necessary officials will be appointed later.

EMEL ZANNI IS INJURED FROM TRUCK MISHAP

Emel Zanni, aged 35, of Nacmen, with a serious accident on Friday night at Sharpsville near Carbon, when he was driving a truck. The last truck load of wheat in the day's haul from James "O'Rourke" when he was driving a truck. The last truck load of wheat in the day's haul from James "O'Rourke" when he was driving a truck. The last truck load of wheat in the day's haul from James "O'Rourke" when he was driving a truck.

GAR WOOD REGAINS SPEED RECORD AT 124.51 M.P.H.

Gar Wood remade the world's speed hour record by sending his Miss America X, a racing car, over a measured mile on the 88. Clark track on Wednesday at an average speed of 124.51 statute miles an hour. The former record of 119.75 miles an hour was made on Loch Lomond, Scotland, July 18 last, by Kaye Don, the British speed boat pilot, who tried unsuccessfully to break the record on the Harnsworth Trophy from Wood. Wood, after the record-breaking run, said Miss America's big 12-cylinder engine had not been wide open and he thought the big, heavy-hauler-thunderbolt could go faster. "How much faster, I can't say," he said. "The motor was milking 2500 revolutions per minute. The limit, with safety, is 2700 r.p.m."

view has been in operation in Mar-

seille, France, for several years and has proved successful. It is stated.

PRIZE WINNERS IN SCHOOL FAIR SPORTS FRIDAY

The following is a list of the prize winners in the various events at the Carbon and district school fair, held last Friday afternoon.

Running broad jump—boys under 12 1 Francis Paxon; 2 Harold Wise; 3 Raymond Lemay; all of Carbon. Running broad jump, boys under 14—1 Bill Waldron, Rosevear; 2 Francis Paxon; 3 Charles Gordon, Avondale. Running broad jump, open class—1 Harry Paxon, Carbon; 2 Clarence Reed, Carbon; 3 William Devine, Avondale.

Hot, step and jump, boys under 12—1 Raymond Lemay, Carbon; 2 George White, Carbon; 3 J. Gordon, Carbon. Hot, step and jump, boys under 14—1 Robert Wise, Carbon; 2 William Waldron, Rosevear; 3 W. White, Gamble. Hot, step and jump, open class—1 Clarence Reed; 2 Harry Paxon; 3 W. Harvey, all of Carbon.

50-yard dash, boys 14 and under—1 R. Salter, Avondale; 2 Stewart Hunter, Rosevear; 3 Gordon Hunt, Carbon. 50-yard dash, girls under 14—1 Jean Hulse, Carbon; 2 Christine Harvey, Carbon; 3 Thelma Gibson, Gamble. 75-yard dash, boys under 10—1 R. Salter, Avondale; 2 Stanley Gouldie, Carbon; 3 A. Alkham, Carbon. 75-yard dash, girls under 10—1 B. Conn, Gamble; 2 Gibson, Rosevear; 3 M. Gouldie, Carbon.

100 yard dash, boys under 12—1 F. Paxon, Carbon; 2 W. Gibson, Gamble; 3 H. Wise, Carbon. 100 yard dash, girls 12 and under—1 Agnes Sherry; 2 Lucy Hall; 3 Jean Heath, all of Carbon. 100 yard dash, boys 14 and under—1 W. White, Gamble; 2 W. White, Carbon; 3 Charles Gordon, Gamble. 100 yard dash, girls 14 and under—1 R. Salter, Rosevear; 2 Dorothy Hay, Gamble; 3 Alma White, Gamble. 100 yard dash, open class—1 Harry Paxon; 2 Wm. Devine, Avondale; 3 Clarence Reed, Carbon. Relay Race, four pupils from school making a team—1 Carbon, team Harry Paxon, C. Reed, F. Paxon and H. White; 2 Avondale, team W. Devine, F. Gordon, C. Gordon and R. Little; 3 Rosevear, team Bill Waldron, J. Hunter, D. Luff and H. Luff.

Wheelbarrow Race, boys 12 and under—1 Avondale, R. Little and C. Gordon; 2 Gamble, W. Gibson and R. Little; 3 Carbon, H. Wise and G. Leman.

Wheelbarrow race, boys 14 and under—1 Gamble, W. White and C. Gordon; 2 Avondale, R. Little and C. Gordon; 3 Carbon, F. Paxon and J. Taylor.

Wheelbarrow race, open class—1 Carbon, C. Reed and H. Paxon; 2 Avondale, C. Gordon and W. Sherry; 3 Gamble, H. Conn and F. Paxon. Sack Race, boys under 12—1 Carbon, F. Paxon; 2 H. Wise; 3 J. Taylor. Sack race, girls under 12—1 Lucy Hall, Carbon; 2 Irene Taylor, Carbon; 3 Jean Sherry, Carbon. Sack race, boys 14 and under—1 J. Taylor, Carbon; 2 J. Taylor, Carbon; 3 William Devine, Carbon. Sack Race, open class—1 J. Taylor; 2 Clarence Reed; 3 Harry Paxon, all of Carbon.

Three-Legged race, boys under 12—1 Gamble, W. Gibson and G. White; 2 Carbon, F. Paxon and W. Rogers; 3 Carbon, A. Kaspak and C. Trumbley.

Three-Legged race, girls 12 and under—1 Gamble, Dorothy Hay and A. White; 2 Carbon, Lucy Hall and Agnes Sherry; 3 Carbon, Agnes Sherry and Mel Fuller.

Three-Legged race, open class—1 Gamble, W. Gibson and G. White; 2 Gamble, C. Gordon and W. White; 3 Carbon, F. Paxon and W. Rogers.

Another week's paper is to be out of existence. The Carbon Herald no longer exists. It has been decided to merge the edition of its weekly edition, The Alberta Farmer, the end of this month.

HON. O. L. McPHERSON FINDS CONDITIONS BETTER

Economic conditions in the southern portion of the province have greatly improved over the corresponding period of a year ago, stated Hon. O. L. McPherson, minister of public works, on his return to Edmonton last week from a tour through the area in which he conferred on relief matters with the Medicine Hat City Council.

He also inspected the Cypress Hills Forest Reserve, of which the turning into a park had been suggested on many occasions. He declined to state whether any action would be taken at the present time. Crop conditions he found much improved in the south and in the Three Rivers-Carleton-Drumheller area, one of the most fertile productive areas of the Carbon district is a fine crop, and farmers will be realizing a double crop this fall, many fields being over a year's crop.

ALBERTA NEWS

Alberta's wheat yield from the crop now being harvested will average 25 bushels to the acre, according to an estimate made by the provincial department of agriculture. It is also estimated that the area sown to wheat will total 2,500,000 acres. At an average of 25 bushels to the acre this would give a total yield of 62,500,000 bushels.

Ontologists who have closely observed the flights of grasshoppers this summer are issuing warnings that a grasshopper plague threatens the entire south of the province, from the Great Lakes, and from the North to south, well into the United States.

What might have been a fire of more disastrous consequences to the town of Leda happened in the early hours of Sunday morning, 11th inst., when the large building or elevator containing the fire grinders, mill, grain store, wheat, stock, and other material, and many houses owned by W. C. Clark, became a total loss. The plant was generally understood to be one of the most complete in the Gaspe-Lake area.

Parsons' assistant, Buffalo Lake, was involved in an appalling accident for the ravages of ducks and geese, thousands of which have been killing the young of the birds, and the birds are being killed by the season's grain had little effect as the harvester was too busy to see it. According to the farmer what is required is an earlier grain season.

The Raymond Elevator factory owned by the Raymond Elevator Co. has 250 employees. Their export for 1930 was more than this year on account of the heavy crop of sugar beets. The tonnage is the heaviest on record, and the elevator is working 55 hours a ton.

THREE BUSHELS OF WHEAT FOR ONE YEAR'S SUBSCRIPTION

Again this year, as last, The Carbon Chronicle is offering subscribers in arrears a chance to pay their past dues to date at the rate of three bushels of wheat for each year in arrears. This offer will be open for a limited time only and when delivering wheat to your local elevator have the agent make out a storage ticket in our favor for the number of bushels of grain required to pay off your arrears in this Chronicle.

This is our contribution in being about grain, wheat, grain, and your farmer should take advantage of this offer and clear off his debt to this newspaper. He will probably never get another chance to do so at this rate.

SPECIAL WARNING

When travelling at night motorists are to that their two headlights and tail light are functioning in a proper manner. Special highway police patrols have had occasion in recent weeks to enforce this law by numerous convictions, and attention to this traffic rule will be carried out throughout the winter months by the police. We trust that our readers who drive motor-driven vehicles will heed this warning, because if caught the penalty one will not receive much change from a ten-dollar bill.

FRACAS ON FRONT STREET LAST WEEK CAUSES MUCH TROUBLE

"Micky" O'Brien Threatens Police Officer and Inflicts Severe Gash With Knife

SENT UP FOR TRIAL SATURDAY

A little excitement prevailed in town on Friday evening last, and also a fracas, an account of a scuffle between the local R.C.M.P. officer and a celebrity.

A firm hand "Micky" O'Brien, employed by J. Hay near Carbon, came into town on Friday and it is alleged spent part of the day under the influence of liquor. Towards evening he became noisy and a public nuisance on front street. The local police officer, Const. Moriarty, stepped in and it is said, ordered O'Brien to leave town, which he refused to do. Const. Moriarty then showed his authority and in the attempt we understand that O'Brien fell to the ground and was allowed to have threatened the police officer and suddenly pulled a knife from his pocket, seized Const. Moriarty about the face and inflicted a severe slash right through the heavy coat ten into the flesh of the face. He was taken to the hospital and the wound was sutured and continued to the last.

The wound is Const. Moriarty's leg. He received three stitches and will probably cause some pain for a time until healed. In the meantime our local officer came out on evening. The fracas was commenced about 7 P.M. O'Brien was summoned before V.R. Magistrate on Saturday afternoon and was sent up for trial.

We understand that Percy Edwards and L.C. McPherson, have purchased new record. Probably the World Record has something to do with the recent installations.

JOE SHARP DIES TUESDAY

We are sorry to report the death of a popular visitor to our town weekly, Joe Sharp, who was connected with the Shere Show, which visits Carbon every Monday night. Mr. Sharp had been taking a little holiday from his activities and was stricken with appendicitis last Monday. He was operated on Tuesday morning, but, unfortunately, the operation was not successful and he died on Tuesday.

Joe Sharp was a resident of Carbon and a lifelong fellow. During his short acquaintance in Carbon he had the admiration of everyone who met him and his sudden passing will be felt among his friends.

SCHOOL FAIR NOT SO GOOD

The tenth annual school fair was held in Carbon on Friday last and the exhibits were not nearly so numerous as last year, owing probably to the later date. The exhibits displayed, however, were of a high standard and in many cases superior to last year. The attending school districts were not as well represented as last year, but the fair was held and this added to the decrease in the number of exhibits.

A RECRUIT FOR BALLYHOO

(Christian Reformer Monitor)

Ballyhoo's value has just had a fresh endorsement. It is the fact that the Ballyhoo & State, the Ballyhoo before attention was called to Ballyhoo's existing role in his father's sin, church, some form of public life, has been found and this added to the decrease in the number of exhibits.

Success Grows Efforts Made To Save Antelope Herds In Their Native Habitat

Canada's success in bringing back the buffalo has been acclaimed by wild life conservationists in many parts of the world but little has been said of her successful efforts in saving the pronghorn antelope in its native habitat in Western Canada. The march of settlement in the West made disastrous inroads on the numbers of these timid animals and when their condition was brought to the attention of the Dominion Government immediate action was taken through the Department of the Interior to establish reserves for their protection and propagation. In 1914 the first sanctuary to be established was that at Watkinsburg, in Watkinsburg Park, an area of 94 square miles in southern Alberta about 75 miles east of Lethbridge. Early in 1915, an area, later to be known as Watkinsburg National Park, about 20 miles north of Medicine Hat, Alberta, was set aside for the protection of antelope in that district and since then the success of the Department's efforts has been most remarkable.

The main work in the conservation of the antelope is done at Watkinsburg Park since the area of eight and a half square miles comprising the sanctuary is fenced and the records of the antelope kept there can be kept. The herd of approximately 425 antelope in this park represents the results of a long and arduous experiment. Previous to 1915 efforts at raising antelope to captivity had been unsuccessful owing to the effects of the shock of capture. Consequently officers of the National Parks Branch of the Department of the Interior, in charge of the work, hit upon the scheme of corralling a herd of antelope on a suitable grazing area. A herd of forty-two antelope were observed feeding north of Watkinsburg National Park, and the shock of fencing the animals without disturbing them was successfully carried out. Since then they have thriven and the number of their captivity and these grateful animals are rapidly being restored in numbers.

At Watkinsburg National Park, as far as observations of these in charge of the park show, the antelope which frequent this unfenced reserve are increasing. Concentration of these animals are noticeably greater throughout the area than previous to the establishment of the park and their future in this part of the province appears assured.

Higher Wheat Price Needed To Bring West Back

However, taking Western Canada as a whole this will not be a debt-paying year. Most farmers will be able to meet their current bills and their taxes and to provide for seed and feed. The more fortunate ones will also have enough to pay the current mortgage interest.

The crop is big enough to make every few cents advance in price important. Westerners are not looking for higher prices, they are praying for them nevertheless. No single factor could do more to bring back the West than a rise in the price of wheat. Nothing else can do the job alone.—Financial Post.

Money In Pie Business

The pie business has been good in Chicago to George Kanopars, 72. He was peddling individual pies when Policeman John Frye asked him about his license. "I can't afford to waste money on licenses," he said. So the policeman searched him to see just how poor he was. In a pocket he found his trousers there was \$7.16.

*Miss Margaret Jones, aged 80, has just resigned as bell ringers at the Lansdowne-Albermarl, Wales, church.

"You only married me for my money." "Just the opposite, dear. Because I had none."—Wahne Jakob, Berlin.

W. N. O. 1961

Wealth From The Land

Farm Products Revenue From Alberta's
Several million dollars' increase in revenue from Alberta farm products is expected in 1932, according to the 1931 figures, compared with \$147,000,000 in 1931.

The 1932 revenue is expected to exceed \$152,000,000 compared with \$147,000,000 in 1931. Alberta's farm animal production for 1932 will total \$16,000,000 it is estimated. The dairy industry is estimated to realize \$12,000,000, while poultry and poultry products may reach \$8,000,000. Miscellaneous commodities, it is believed, will return \$300,000.

These figures, added to \$116,000,000 set as the value of this year's field crops, result in the estimated \$152,000,000 total.

This does not allow for probable increases in market prices. If any improvement in prices occurs the total will be much larger, it is pointed out.

Reducing Temperature

Offices Cooled As Well As Heated By Steam

A system for heating business offices by steam has been tried with success in Detroit. Steam under high pressure is passed through a nozzle at high velocity where it is as a pump to remove the air and vapor from a tank of water. This produces a vacuum, cools the water rapidly, and the water is then pumped through cooling coils to reduce the temperature in the rooms. Modern science has thus destroyed another illusion, that janitors only work in the winter months.

(By Ruth Rogers)

66.2

SMART AND LOVELY FOR FALL
SCHOOL TERM IS THIS WINE-RED TWEED

What about a new woolen frock for early fall school year? This is the smartest and chicest school frock you can wear today. And it's so simple to make.

Lots of woolen materials will be lovely for it from the woolen fancies to the lightweight tweeds. You could also make it of rayon novelties and wool crepe. Quite a smart dainty effect is obtained by the pleated ruffling trim.

Style No. 662 is designed for sizes 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yards of 39-inch material with 2 yards of plating.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

ASSISTANT (to Beach Inspector): "What are we to do about that one down there, sir? She's wearing a bit of costume and then a bit before the next hit"—London Opinion, Engad and

Mild Winter Predicted

Cre Indians Say There Will Be Lots Of Snow

Western Canada can prepare for a mild winter with plenty of snow. A late fall and an early spring will cut down the winter far below its usual length. That's the decision of the official weather men of the Cre Indians at The Pas, Man.

Year after year the Indians have been calling the turn on the weather and always correctly. The uncanny skill of the aborigines in forecasting the weather for the coming season is highly respected in the north country. To gain their information they closely observe the actions of muskrats and other animals at the time of the year.

Paris Fighting Aids

Paris is fighting its third invasion of pests. First a swarm of mosquitoes visited the French capital. Then followed a plague of blue flies. This time it is ants. The health department has marshalled all its forces, armed with sprays, disinfectants and other paraphernalia, and is directing an onslaught on the invaders. A number of bakeries, the houses and other buildings in other parts of the city have been overrun by the busy insects.

About nine per cent of the forest fires are due to railroads, it is said.

China has decided to participate in the Chicago exposition next year.

HUNTING IN CANADA

WIDE VARIETY OF BIG AND SMALL GAME EASILY REACHED

SEASONS OF GENEROUS LENGTH

Hunting Grounds Easy Of Access
Accessibility is an outstanding feature of much of Canada's hunting territory. The country is well served by roads, railways and steamboat lines, over which the sportsman may travel in comfort, to the "going in" point. Areas previously inaccessible may also now be reached by a simple trail. Areas previously inaccessible may also now be reached by a simple trail.

Vast Hunting Areas
This country possesses over 1,000,000 acres of forest, which shelters game animals ranging from the timid rabbit to the huge and dangerous grizzly bear. Moose, caribou, elk, deer, bighorn sheep, mountain goat, timber wolf and bear are plentiful and may be hunted during open seasons of generous length.

Wild Fowl Abundant
The numerous lakes and ponds of northern Canada are the breeding grounds of vast waterfowl populations of the American continent consequently ducks, geese and other waterfowl are plentiful in normal years. The ruffed grouse or partridge is the most important upland bird and is common to every province, while woodcock, partridge chicken, Hungarian partridge and ptarmigan provide good sport in certain districts.

Conservation Of Game
In Canada a practical form of conservation of game is the extensive national and provincial parks. In these areas the game is protected by the game laws and spreads over into the surrounding country. This favourable condition, coupled with sound protective legislation regulating the open

seasons, bag limits, issuing of licenses, etc., assures continuation of a supply of game animals and birds in their native habitat. Canada is thus able to offer the sportsman exceptional opportunities for hunting in sport.

Hunting With Camera
To the camera-hunter and the student of wild life, the Canadian Provinces offer unusual opportunities for interesting experiences and records. There is no closed season on game in the camera-hunter's and, throughout the year, he will find favourable conditions to study the habits of game animals and birds and to photograph them in their natural surroundings.

Game Laws Of The Province
The game laws of the different provinces are drafted by the provincial governments with a view to meeting local conditions; consequently there is no uniform game law for the Dominion as a whole. As these game laws are subject to revision from year to year, persons contemplating a hunting trip are advised to obtain copies of the current game laws and regulations of the province in which they intend to hunt.

Exports Of Home Grown Wool Have Developed Rapidly During The Past Few Years

Plymouth Rocks Sent To Arctic Outpost

Aklavik Residents Look Forward To Having Fresh Eggs

No longer will residents at Aklavik, one of the last outposts in the western Arctic, sigh for nice fresh eggs. Aklavik, which is more than 1,500 miles north of Edmonton and up in the Arctic circle, has had its population increased by thirteen pupils and two teachers, and the residents will have fresh eggs—that is if the hens continue to lay.

G. M. Cormie, provincial poultry commissioner, shipped the feathered flock to P. Stromberg, described as a "poultry raiser of Aklavik." Aklavik has no chickens at the present time, it is stated.

The chickens travelled by train to McMurray and then by boat to Aklavik. They are pure-bred-to-day barred Plymouth Rocks and are five-and-a-half-month-old pullets.

The hens are in good condition to face the long winter darkness of the north. On the trip north they were fed a special laying mash and whole grain to keep them laying until they arrived.

On announcing the trip by the chickens, the poultry branch remarks that civilization is going north. In this connection it might be recalled that a team of horses went as far north as Arctic Red River by boat last year to do various pieces of work around different posts. At Arctic Red River children who had never seen horses gaped open-mouthed at them and called them "big dogs."

Imagine The Rest

The somewhat shortened golf when he reached a stage of the game when desperate measures were necessary. Taking a tall tee he mused sagaciously, and instantly searched the heavens for the ball. "Where did that one go to, caddy?" he asked in accents of great hope. "A couple of feet behind yer, sir," answered the boy gloomily.

Trate Parent—"Didn't I see you kissing my daughter, sir?"

Nervy Youth—"How should I know? Do you think I'd be growling around when I was doing a thing like that?"

Canadian exports of home-grown wool have developed rapidly since the war. They now amount to a yearly average of 7,000,000 lbs.—about 40 per cent of the whole Canadian production as compared with only a million pounds per annum in pre-war days.

Prior to 1931, the bulk was taken by the United States, but last year the United Kingdom took the major part of Canadian wool exports.

These facts are revealed in a new report on the production of, and trade in, wool issued by the Empire Marketing Board: "Wool Survey: A Summary of Production and Trade in the Empire and Foreign Countries."

Nearly one-half of the world's raw wool, and over two-thirds of the wool entering trade in production within the British Empire. The world's sheep population is estimated at nearly 800 million head, of which about one-third are in the Empire. They produce between 3,500 and 4,000 million lbs. of wool per annum, and of this amount about 1,500 million lbs. including much of the best wool in the world comes from the British dominions of Australia, the Union of South Africa and New Zealand.

Among the other important producing areas, consisting of South America, the United States of America and Russia. South America has a surplus for export. The United States of America is largely self-sufficient as regards merino and crossed wools, but imports large quantities of Russia produces almost entirely carpet wools, and imports both the finer wools and wools of the carpet type. Some of these countries seem likely to assume any importance in the near future as an exporter of raw wool.

After reviewing the development of the sheep population, the wool production and the wool trade of each of the principal countries, the survey together with the course of raw wool prices over the past 40 years, the survey reaches the following conclusions: There has been no exceptional increase in the sheep population or the wool production of the world in recent years; indeed, between 1923 and 1930 there appears to have been a small decrease in wool production, and although the year 1931, according to the partial estimates at present available, probably witnessed an increase in production over 1930, it is not anticipated that the record level of 1928 will be appreciably exceeded.

British Empire countries have maintained their share of the world's sheep population at about one-third, and their share of the wool production of raw wool at about one-half. In the export trade, in which the share of Empire countries is over two-thirds of the world total, there has been, on the whole, little variation since 1925 in the consignments of raw wool from producing to manufacturing countries, and there would appear to be no abnormally large accumulation of stocks of new wool in the principal exporting countries. At the end of the 1929-30 season, when stocks in certain of the principal producing areas were higher than usual, they still formed only a very small part of the aggregate annual production. No large stocks have been allowed to accumulate through efforts to maintain prices, and proposals to restrict the sales or stabilize the prices of raw wool have been vigorously opposed.

Are Safely Kept
Units of weight and measures are kept buried in England and are dug up about every 100 years. The standard yard measure, made in bronze, and the standard pound and kilogram weights, of platinum, are kept imprisoned in the masonry of the Houses of Parliament.

The Bulgarian language is spoken by approximately 5,600,000 people.

EARLY STUDY OF ARMS CUT IS PROMISED

Geneva, Switzerland.—The League of Nations council meeting was confronted with a veritable kaleidoscope of international developments, which were touched off when Russia went her joint for speedy consideration of substantial arms reduction plans.

This development came in the conference bureau, a sort of steering committee for the general conference, which is expected to resume soon. Maxim Litvinoff, the Russian delegate, proposed the bureau be set up to study arms reduction plans.

The two gravest problems before the council are the German demands for equality of armaments on a threat of withdrawal from the disarmament conference, and the filing of the report on the far east by Lord Lytton and his commissioners.

Haron Konstantin von Neurath, the German foreign minister, pressed Germany's demand for equality, and there was evidence league statesmen proposed to concentrate immediately on the German problem.

The Japanese were apparently deeply interested in the two reports widely circulated here: first, that France had changed its attitude towards Japan and now will be found much less friendly to Tokyo's position, and second, that Blum de Valere, the Irish Free State president who will preside over the council, will have little sympathy with Japanese views.

Observations Will

Be Given Hearing

Ex-Servicemen May Submit Memorandum To Council

Ottawa, Ont.—Opportunity to organizations of ex-servicemen who desire to offer any observations relating to the administration of the pension act will be given by the Pension committee, it was decided when they met "in camera."

The statement adds: "It is requested that such observations should take the form of a memorandum in writing which will be placed before the committee for its consideration, if received by the secretary, Daily Building, Ottawa, before the end of September."

Manitoba Marketing Bonds

Syndicate Is Handling The Four Million Dollar Issue

Winnipeg, Man.—Manitoba's new \$4,000,000 bond issue will be placed on the market at \$98 and will yield a little better than 5.55 per cent interest, Hon. E. A. McPherson, provincial treasurer, announced. A syndicate of eight banks and investment houses is handling the issue. All arrangements have been completed for offering the bonds to the public, Mr. McPherson said. They will bear interest at the rate of five and one-half per cent on their face value, and will mature in 1935. Principal and interest are payable in Canadian funds.

Chinese Won Case

Legio Of Orient Was Convincing For Toronto Magistrate

Toronto, Ont.—Unanswerable logic of the Orient won a case for the H. H. health court. Lee was accused of dumping rubbish over his back fence on to a piece of property. Arguing his own case Lee reasoned thus: The grass on the lot was nearly a foot high but where the rubbish was there was no grass at all. Therefore, it had lain on the ground for a much longer period than two weeks. Lee moved in only two weeks ago. Magistrate Arthur Tucker, speechless, dismissed the case with a wave of the hand.

No Holiday For Commons

Ottawa, Ont.—The House of Commons will sit on Thanksgiving Day, Monday, October 10. Inquiry made in highly informed official circles elicited the definite information that the Commons would proceed with the debate on the address on that day. Parliaments open the preceding Thursday.

Approve Distress Relief Fund

Brescia, Italy.—The Danubian Conference has approved in principle a draft convention recommending among other steps the creation of a stabilization fund of \$75,000,000 gold francs to relieve distress in central and southeastern Europe.

W. N. O. 1961

Ask Aid For Bay Route

Regina Men Want Traffic Department To Solicit Shipments

Ottawa, Ont.—Establishment of an active traffic department by the government which would solicit shipments for the Hudson Bay Railway and the northern coast of Churchill has been urged on Hon. R. J. Manion, Minister of Railways and Canals. This step was advocated by C. B. McKee, past president of the Regina Board of Trade, and George A. Ewart, present commissioner of the board.

"Mr. Manion received my very cordial and courteous," said Mr. McKee. They were assured the matter would be given consideration.

Both Regina men advanced the opinion the government, to crown its work in providing an outlet to the sea for the prairie provinces, should have an active traffic department in order that importers may route as large a portion of their goods as possible via the new trade channel.

"Through the Hudson Bay Railway, western Canada is brought 1,000 miles closer to the markets of the United Kingdom," said Mr. McKee. "When the insurance rates come down to a more equitable level, a market saving will be effected in export costs," he added.

Some 250,000 bushels of wheat would be exported to Great Britain this season over the northern route, and Mr. McKee stated the first shipment of 250,000 bushels had been carried out at a saving of approximately a cent a bushel.

Indians Encamped

On Ancient Reserve

Take Possession Of Land Near Selkirk, Manitoba

Winnipeg, Man.—Led by a militant chief a band of 35 families of the Sauterie Indian tribe has defied official authorities and encamped on what they claim as their ancient reserve, 12 miles north of Selkirk, Man.

The Indians claim the move marks the climax of a dispute of 35 years' standing. In 1907 the band surrendered the reserve at St. Peter's and undertook the terms of an agreement were to get \$50 per head and a reserve at Fisher River. Chief Grey Eyes, head of the band, claims his people never received \$50 and are unable to make a living on the Fisher River reserve.

Royal Canadian Mounted Police later recovered 35 families from their old stamping grounds. The natives, who had been trespassing on private hay fields since last July, camped along the road allowance.

Britain Faces Milk Strike

Better Prices For Product Is Asked By Farmers

London, England, Tuesday, September 20, faced a country-wide hold-up of milk supplies as following farmers' decision to inaugurate a "milk strike" October 1, following breakdown of negotiations between their representatives and representatives of the milk-distributing combines over contract for the forthcoming year.

A statement issued by the National Farmers' Union says the refusal of the milk distributors to raise farmers better prices for their product during the coming year renders inevitable a hold-up in the supply. Unless a last-minute step is taken, the "strike" will go into effect at the end of this month.

All Canada's Gold

Comes From Mines

No Swindle Here As Reported From Washington

Ottawa, Ont.—Presumably all the gold which flows into the mint here comes from the mines. It was stated at the department of finance.

Despatches from Washington state that action has been taken there to keep swindlers from buying gold and jewelry at bargain prices on the pretence that they want the metal for the federal government. Later this gold is melted down and taken to the mint, there to be exchanged for currency.

Apparently no such swindle has gained any headway in Canada.

Judge Of Supreme Court

Ottawa, Ont.—Mr. Justice Oswald C. Crockett, of the King's Bench Division of the Supreme Court of New Brunswick, will be appointed a judge of the Supreme Court of Canada. He fills the vacancy caused by the death late last fall of Mr. Justice R. L. Newcombe, a former member of the Nova Scotia Bar.

MENTIONED FOR PROMINENT POST

Bishop Owen of Niagara and Deschamps of Montreal (left and right respectively), are two of the prominent Church of England dignitaries who are mentioned most frequently for the post of Bishop of Toronto. The election takes place on October 24th when a successor to Archbishop Sweeney will be chosen by synod delegates.

HOME SECRETARY EXPLAINS ACTION ON TRADE PACTS

London, England.—Trade agreements reached at the Ottawa Imperial Economic Conference by the United Kingdom and the Dominions were condemned in a resolution adopted by the executive of the National Liberal Federation.

The resolution urges the government, parliament and all electors to "seriously consider the dangers and vicious principles involved in the Ottawa agreements and oppose them by every means in their power." However, no call is made on Liberal ministers to resign from the National government.

Sir Herbert Asquith, Home Secretary, informed the meeting. Sir Herbert Samuel, Home Secretary, informed the meeting.

The resolution states that the Ottawa proposals were discussed by the cabinet on August 28 immediately after the return of the United Kingdom delegates. Two days later he had sent to his Liberal colleagues in the government a memorandum in which the situation which had arisen was reviewed and a definite course of action suggested.

Plan Trip To Arctic

French Explorers May Undertake Journey Across Canada By Air

Montreal, Que.—French explorers who made expeditions into Africa and into central Asia by carterial automobiles, may soon undertake a journey across Canada into the Arctic circle.

Jean Alouche, a Parisian journalist, who described the previous explorations, is in Ottawa to discuss the possibilities with General J. H. McCreery, commissioner of the Royal Canadian Mounted Police, and to map out for himself an advance trip into the country. The journalist reached here from France by the "Canard" "Aurora."

Alouche will proceed to Vancouver and thence to northern ports of the Pacific. He will visit outposts of the Royal Canadian Mounted Police and missions of the Oblate Fathers in the land of Edmonton. From Dawson City, which he knows well and has visited before, he will travel by aeroplane to Akivik.

Hutchinson Says Route

Was Safest Possible

Wrecking Of Trans-Atlantic 'Plane Just Bad Luck

Aberdeen, Scotland.—The Hutchinson family, who with their crew of four were rescued from the bleak Greenland coast after wrecking their trans-Atlantic plane recently, landed at Errol, Scotland, from the steam trawler, "Lord Talbot."

George Hutchinson, his wife and two small children were all well, although the two girls appeared to be tired. They are en route back to New York.

"If our radio had a little more range we would have been able to pick up our bearings and would have been all right," Hutchinson said, describing the accident.

Hutchinson said he wanted it understood that the adventure of his "Flying family" was not a "stunt flight."

"The children have always been with us in our flying," he said. "The route was the safest possible and we were only 14 miles from safety when the accident happened. It was just a bit of bad luck."

Saskatchewan May

Have London Agent

Premier Anderson Intimated Appointment Was Being Considered

Saskatoon, Sask.—Speaking at a meeting here of the Kiwanis Club, Premier Anderson intimated his government was considering the appointment of a Saskatchewan agent in London, England.

He said one of the duties of such an official would be to look after the merchandise leaving Great Britain for the prairies routed by Churchill and Hudson Bay. In addition, the agent would develop trade for Saskatchewan in British markets. He also declared the people of Saskatchewan are not satisfied with goods brought in by the Bay who greatly assist in developing the route.

Japan May Leave League

New York.—Hiroshi Satoh, arriving in this country to be charge d'affaires at the Japanese embassy during Ambassador Katsumi Debauchi's leave of absence, declared his country "would not hesitate a minute" to withdraw from the League of Nations if it finds itself "compelled" by the report compiled by the commission headed by Lord Lytton of the United Kingdom.

These are the major recommendations put before the report.

There is a thirty-veiled reference to the "ineffectiveness" of freight

being one of the important contributing factors in the present problem. This can have reference only to the Crown's Post Pass rates, en route on the railways by statute 1925. The complete report, when issued, seems likely to carry a recommendation that statutory or legislative control of railways be withdrawn.

There is an intimation that an official plan for the National Railways will be found in the official report of the report, which indicates that the National's capital structure may be up for revision.

In the negative sense, the report is important because it strongly condemns any scheme of railway amalgamation or of the leasing of the National to the Canadian Pacific.

Accompanying the abstract of the report is a brief statement from Premier R. B. Bennett in which he declares that legislation giving effect to the recommendations which the public interest will be introduced shortly after parliament opens in October.

Court Rules Firm Bankrupt

Investment Firm Of Mchachy and Sharpe Out Of Business

Winnipeg, Man.—The second firm with which J. A. Mchachy, former barrister of the University of Manitoba, Chancellor of Church of England and prominent Winnipeg lawyer was associated, has passed out of existence. The investment firm of Mchachy and Sharpe was declared bankrupt and last Saturday the legal firm of Mchachy, Sharpe, Parker, Crawley and Richardson, was dissolved.

Evidence revealed at the hearing of the bankruptcy petition is only a "small part of the tale that yet will have to be told," Mr. Justice Macdonald declared in granting the university's petition.

The hearing, which Mr. Justice Macdonald said had revealed "alarming disclosures," disclosed that books of the company were kept in a "slipshod manner," that all monies handled by the firm were kept in a single bank account, that the company books were audited by an accountant from the government, controlled by the general office, also engaged by Mchachy and Sharpe, that the firm had cash assets of only \$600, and that clients were notified periodically that all accounts were in order though some trust accounts had not even been settled in the last 16 or 17 years.

Lawyer Drowned At Coast

E. C. Saville Lost Life When Boat Sank

Salmon Arm, B.C.—Eustace Claude Saville, barrister and solicitor here for more than 20 years, was drowned while fishing off the Adams River, 35 miles from here on Shuswap Lake.

Saville was in a boat with Major H. H. Smith when it overturned. The other fishing party went to their aid, rescuing Major Roberts, but Saville had evidently been drawn under by the strong current.

Prize Opens British

Trade Exhibition

Was Warmly Welcomed On Arrival In Danish Capital

Copenhagen, Denmark.—Eight hundred Danish accorded an enthusiastic reception to the Prince of Wales when he arrived to open the British trade exhibition.

Premier Issues

SUMMARY OF RAILWAY PROBE

Ottawa, Ont.—Complete revolution in control and regulation of all railways as well as in the control and management of the National system is the message implied by the abstract of the report of the Duff transportation commission issued by Prime Minister Bennett.

Three recommendations open an unbridgeable chasm between railway administration in the past and railway administration in the future. They are:

1.—Abolition of the present National Railway directors and the substitution of the supreme body of control of a board of three trustees.

2.—Provision for a joint committee of provincial and National Railway trustees and Canadian Pacific directors to formulate and put into operation joint economies, to remove duplication, to prevent unnecessary competition.

3.—Creation of a super-control board, called an arbitral board, of three members to decide matters upon which the joint committee cannot agree.

This board, within a defined, but wide, field of jurisdiction, is to have authority over both railways as well as over the board of railway commissioners. From a decision of the arbitral board there is to be, really, no appeal.

These are the major recommendations put before the report.

There is a thirty-veiled reference to the "ineffectiveness" of freight being one of the important contributing factors in the present problem. This can have reference only to the Crown's Post Pass rates, en route on the railways by statute 1925. The complete report, when issued, seems likely to carry a recommendation that statutory or legislative control of railways be withdrawn.

There is an intimation that an official plan for the National Railways will be found in the official report of the report, which indicates that the National's capital structure may be up for revision.

In the negative sense, the report is important because it strongly condemns any scheme of railway amalgamation or of the leasing of the National to the Canadian Pacific.

Accompanying the abstract of the report is a brief statement from Premier R. B. Bennett in which he declares that legislation giving effect to the recommendations which the public interest will be introduced shortly after parliament opens in October.

REVIEW SHOWS CANADA IN GOOD EXPORT POSITION

Ottawa, Ont.—The present crop year commenced with Canada occupying a favorable export position, undoubtedly the best position held by the Dominion since 1928. The Canadian position at the present time is largely due to two main factors, namely, lack of foreign competition and price levels on a sound export basis.

Mr. Justice Macdonald declared in granting the university's petition.

The hearing, which Mr. Justice Macdonald said had revealed "alarming disclosures," disclosed that books of the company were kept in a "slipshod manner," that all monies handled by the firm were kept in a single bank account, that the company books were audited by an accountant from the government, controlled by the general office, also engaged by Mchachy and Sharpe, that the firm had cash assets of only \$600, and that clients were notified periodically that all accounts were in order though some trust accounts had not even been settled in the last 16 or 17 years.

In regard to the domestic situation in Canada, it is stated that:

"The large wheat crop combined with a good export demand for Canadian wheat is stimulating the movement of wheat internally and externally has shown a decided improvement over the movement of the same weeks last year. Deliveries to country elevators, the movement from country elevators to terminal elevators, movement from the Great Lakes and finally the export movement, are all above last year."

Of particular interest is the brisk movement of Canadian wheat into export trade and into export position. For the seven weeks ending September 16, 1929, 28 million bushels of wheat were shipped by water from Port Arthur and Fort William compared with 25 million bushels for the corresponding weeks last year.

Prize Opens British

Trade Exhibition

Was Warmly Welcomed On Arrival In Danish Capital

Copenhagen, Denmark.—Eight hundred Danish accorded an enthusiastic reception to the Prince of Wales when he arrived to open the British trade exhibition.

The price came by aeroplane from England, setting foot on German soil for the first time since the World War began. He reached Kastrup airport, near here, at 6:25 p.m. A fleet of Danish military and police cars met him at the airport.

Further Pay Cut

For C.P.R. Officials

President Hopkins Reduction Will Not Be For Long

Montreal, Que.—On October 1 salary reductions will be effected among all the higher officials of the Canadian Pacific Railway. According to an official statement, the president, directors and members of the executive committee will accept a cut of 15 per cent. Salaries of general, district, divisional and departmental officials will be lowered 10 per cent.

Hope was expressed by E. W. Barry, president of the railway, that it will not be necessary to continue the reduced rate for too long a period, and that the former salary schedule will eventually be restored.

Three Firms Are Losers

Thieves Carry Away Safe Containing Two Thousand Dollars

Winnipeg, Man.—Cracksmen broke into the office of the Corona Lumber Company at Starbuck, near here and carried away a safe containing about \$2,000. The cash belongs to the Ogilvie Milling Company, the Manitoba Wheat Pool and Western Canadian Elevators, Ltd.

However, the details of the amount being taken and the firm were in the safe. The burglars escaped in a stolen truck.

Crew All Officers

Victoria, B.C.—Following a full day's complement of official officers, the first ship so named to leave the port of Glasgow, the British steamer "Mentor," Capt. J. L. McQuinn, of the Donkington line, is in Victoria after a passage of thirty days from the Clyde.

Chatus Record

Kiel, Germany.—Lola Schaefer claimed the world's record for a woman's passage of the English Channel, had dropped 7,300 meters (about 25,000 feet) in 28 minutes.

The executives of the Canadian Bar Association and guests on the terrace of the Banff Springs Hotel. The convention visited the famous Rocky Mountain resort as luncheon guests of H. H. Bennett, Prime Minister of Canada. Left to right are: (standing) G. H. Barry, K.C., Regina; Louis St. Laurent, K.C., Quebec, past president; E. H. Coleman, K.C., Winnipeg, secretary-treasurer; D. H. Laird, K.C., Winnipeg; E. K. Williams, K.C., Winnipeg; Robert Tachereau, K.C., M.L.A., Quebec, honorary secretary; J. A. MacLeod, K.C., Calgary; (sitting, left to right) Maître Olivier Jullin, Paris, official French delegate; Mrs. W. P. MacCracken, Washington, D.C.; Hon. N. W. Rowell, P.C., K.C., Toronto, president of the Association; Madame Julia, Mrs. A. L. Smith, Calgary; Hon. W. P. MacCracken, Washington, D.C., official American delegate; and A. H. OVER 2 MILLION JARS USED YEARLY

THE HOUSE OF
DREAMS-COME-TRUE

— BY MARGARET FEDLER

"The Splendid" of "The Herald"
Holder & Strington, Ltd., London.

CHAPTER XXXII.—Continued.

"Rest!" said, "Rest!" Do you realize that I shall have all the remainder of life to—rest in! There'll be nothing else to do."

She released herself very gently from Tormarin's arms and, crossing the room to the window, stood looking out.

"How funny!" she said in a rather high-pitched uncertain voice. "It all looks just the same—although everything in the world is changed."

He came and stood by her side. "No," he said quietly. "Nothing is changed, dear. Our love is the same as it was before. Always remember that."

"But we can't ever marry now."

"No. We can't marry—now. You'll never have the Tormarin tempo to bear with, after all!"

She laid her hand swiftly across his lips.

"It was dreadful!" she said, recalling the terrible scene which she had interrupted. "It—it hardly seemed—your, Blaise."

"For the moment it wasn't. It was the Tormarin devil—the curse of every generation. But I think that Vargny woman could turn a saint into a devil if she tried! She said something about you—and I couldn't stand it."

"Was that it? Then I suppose I shall have to forgive you—with a pale little attempt at a smile."

But the half-smile slowly faded again almost instantly.

"Oh, Blaise, what would your temper matter if we could still be together?" she cried passionately. "Nothing in the wide world would matter then!"

Presently she spoke again.

"It's worse for you than for me. I wish it were more equal."

"How worse for me? I don't understand. Unless—with a brief, sad smile—"you love me less?"

"Ah, you know I don't mean that! But I've only the separation to face. I'm not tied to somebody I don't love. You've got Nasta to consider."

"Nasta!" He gave a short, grim laugh. "Nesta can go back to where she came from."

"There was a long silence. At last Jean broke it."

"Blaise, you can't do that—you can't send her away again!" she said in quick, low tones. "She's your wife."

"My wife! She seems to have been puffed of the fact—and to have wished me to be equally oblivious of it—for the last few years."

"Yes, of course she's been wrong, wickedly wrong. But that doesn't alter the fact that she's your responsibility. Blaise. You must take her back."

"Take her back?"—violently. "It's best if I do. She's chosen to live her life without me for the last few years—she can continue to do so."

Jean laid her hand on his arm. She was smiling wistfully.

"Dear, you'll have to take her back," she persisted gently. "Don't you see—she's not wholly to blame?"

for SPRAINS

Robinson's is gentle, it penetrates deep, it soothes, it cures, it relieves, it restores.

MINARD'S

"KING OF PAIN"

MINIMENT

W N T 1061

You've admitted that. You've blamed yourself in a large measure for her running away. It's up to you now to put things straight, too—to give her the chance she didn't have before."

"You're discounting those last few years," he returned gravely. "These years in which she has lived a life, allowing me to believe her dead—chastely and deceiving me as no man was ever cheated before. She's cheated me out of my happiness—heavily—"taking you from me!"

"Yes, I know." Jean's voice quivered, but she steeled it again. "But even in that, she was not solely to blame. You've told me how—how weak she is and easily led away. And she's very young. What chance would Nasta have of asserting her will against her sister's, even had she wished to return to you? She ran away from Staple in a fit of temper and because you had frightened her. After that—you can see for yourself—"

"Madame de Vargny is responsible for everything that has happened since."

Tormarin remained silent. The quiet justice of Jean's summing up of the situation struck at him hard.

She waited a moment, then added quietly:

"He wished round her back, Blaise."

"And you?" he exclaimed. "You? Did you ever love me, Jean, that you can talk so coolly about turning me over to another woman?"

She whitened at the bitter accusation. In his tones, but he did not flinch.

"It's just because I love you, Blaise, that I want you to do this thing—the only thing that is worthy of you. Oh, my dear, my dear—her hands went out to him in sudden helpless pleading—"do you think it's easy for me?"

"The desolate cry pierced him. He caught her in his arms, kissing her forehead lovingly.

"Sweetheart! . . . Forgive me! I'm half mad, I think. Believe me, that you forgive me!"

"You're right, Jean, glad to feel the straining clasp of his arms about her—rest once more in his safe arms against his heart."

"But it was dreadful!" she said, trembling. "There is no question of forgiveness between us two. There never was. We were never truly—body and soul—struggling in the dark, and there's only duty—brokenly—only duty—to hold to."

"They stood together in silence, comforted just a little by the mere human touch of each other in this moment of their anger—both of them only came upon them, yet knowing in their hearts that this was the very comfort that must for ever be denied them in the lonely future."

At last Jean raised her head from its resting-place as her eyes searched Blaise's face, asking the question which she cried passionately. "Nothing in the wide world would matter then!"

"Jean, is it your wish I do this thing with Nasta back?"

He felt a shudder run through her frame. Twice she tried forcefully to answer. At last she forced her dry lips to utter an affirmative.

"So be it."

His answer sounded in her ears like the stroke of the mallet on the anvil. The future was settled. Henceforth their lives must lie hence.

"So be it," said Blaise. "She shall come back and take her place again at Staple."

Jean clung to him a little closer. "Blaise, beloved—I know the harder part will be yours. But mine won't be easy, dear. I shall go to Charwood with de Claire at once—tomorrow—and it won't be easy, when I see in an evening the lights twinkle up at Staple, to know that you two are within sight, in from the world together while I'm outside—always outside your life and your love."

"You'll never be outside my love," he said softly. "That's yours, your love, and so no other woman shall rob you of one jot or tittle of it."

She was his wife twenty times over, as the mistress of Staple. She shall bear my name and live as my wife in the eyes of the world. But my love—that is yours, utterly and entirely. Yours and no other's."

She lifted her face to his, and their lips met in a kiss that was a seal of love and a promise of happiness.

"So mine yours," she said. "Now and forever, in this world and the next. Oh, Blaise—beloved!"—she clung to him in a passion of love and anguish and straining belief—"Some day, surely, in that other world, God will give us freedom to take our happiness."

CHAPTER XXXIII.

The Returning Tide

Two months had elapsed since Fate's dividing sword had fallen, for ever separating Jean from the man she loved and the subsequent march of events, with the many changes involved and the bitter loneliness of

sol entailed, had made the two months seem to her more like two years.

She had left Staple for Charwood on the day following that of Madame de Vargny's visit. It was longer possible for her to remain under the same roof with Blaise, where the enforced strain of meeting each other daily, and of endeavouring to behave as though nothing more than mere commonplace friendship linked them together, would have been too great for either of them to endure even for the few remaining days which still intervened before the date originally planned for her departure.

Lady Anne, with her usual sympathetic insight, had made no effort to dissuade her, reluctant though she had been to part with her. For herself, the fact that Nasta was alive had come upon her in the light of an almost overwhelming blow. She had never liked the girl, whereas she had grown to look upon Jean as a beloved daughter, and no one had rejoiced more sincerely than his mother when Blaise had confided to her the news of his engagement. At last she would see that grey page in his life turned down for ever and the beginning of a newer, freer page, illuminated with happiness and joy.

And instead, like a tide that had receded far out and then rushes in again with redoubled energy, the whole misery and sorrow of the past had returned upon her in a thousand times accentuated by reason of his love for Jean.

It was with a heavy heart, therefore, that Lady Anne, together with Nick, quitted Staple and established herself for the second time at the Dover House, relating that in fact Jean and Blaise was bringing home as his bride, added but a keener pang to her sorrowful thoughts.

She watched with anxious eyes the progress of events at Staple. At the commencement of the new regime Nasta had looked upon her with repentant and ashamed of her conduct in the past, and there was something in the little half-spoiled girl's air with which she had at first reassured her position of chateaux of Staple, deterring eagerly to Blaise on the subject of her return.

And indeed, when she came to please him and conform to his wishes. It held something of the appeal of a forgiven child who tries to atone for former misdeeds by a most alarming amount of virtue.

She accepted with meek docility Blaise's desire, regarding the purely formal relations upon which their married life was henceforth to be based, apparently thankful to be reinstated in his life on any terms whatsoever that he chose to dictate.

"I know I have been bad—bad," she declared. "To run away and leave you like that, and—"

"I hope for you to love me again—"

"And Tormarin had replied with unmistakable sincerity.

"No, you can't hope for that. And I'm glad you understand and recognize the fact. Still, we can try to be good friends, Nasta, at least."

But this tranquil state of things only lasted for a comparatively short time. The very day when the satisfaction of her reinstatement began to wear off, Nasta became self-assured and, apparently, considerably less frequently visited by spasms of repentance and remorse.

Her butterfly nature could retain no very deep impression for any length of time, and gradually the characteristics of the old Nasta—the pettish, self-willed, pleasure-loving woman of former times began to reassert themselves.

Blaise tried hard to exercise forbearance with her and to treat her, at least with justice and with a certain meed of kindness. But she did not second his efforts. Instead, she became more arrogant and difficult as time passed on.

She was no longer satisfied by the fact that she was once more installed as the mistress of Staple. She demanded a husband who would surround her with all the little attentions that only love itself can dictate, when she could not afford to be cold and cajole as the fancy took her, but who would always come back to her, when she felt, ready anew to play the adoring lover.

(To Be Continued.)

Growing Colder Here

Two Russian families are raising cattle on farms near New Bern, North Carolina. The cattle bones are fully developed, and the Russian is well pleased so far with the success of their crop. They raised cattle in their native country.

The teacher of a gliding school in Germany has trained falcans to fly within a limited area, and he is studying their soaring flights with the aid of a motion picture camera.

Flush away those ugly Yellow Stains...

Gillett's Lye cleans closet
bowls without scrubbing.
Banishes odors, kills germs,
frees drains...

WHAT woman doesn't want to get rid of it! The most unpleasant part of house-cleaning. Scrubbing toilet bowls.

Thanks to Gillett's Pure Lye... this annoying job has been made easy. Just sprinkle Gillett's Lye—full strength—into the water. Off come all stains... without scrubbing. Germs are killed... odors banished.

And more important, Gillett's Pure Lye will not eat away enamel, or destroy the finish of sinks and bathtubs.

REMEMBER—this powerful cleaner and disinfectant makes all your household cleaning easier. Ask for Gillett's Pure Lye.

FREE BOOKLET: The Gillett's Lye Booklet shows you how to avoid back-breaking work. Give instructions for easy making, free of charge. Send for it now. Write to: Gillett's Pure Lye Co., P.O. Box 100, St. Louis, Mo.

GILLETT'S LYE
EATS DIRT

THE RHYMING OPTIMIST

By Alice Michalson

LOVES WORDS
Love has few words. Each threshold phrase
Has rung through countless lovers' ears.

Since Caesar sought Egyptian ways
And Jacob served in Rachel's house,
So poor are they, so old, so weak,
Such foolish and such futile things.

New speech to lend his longing wings.
So poor! But, ah, how sweet, how dear
They fall upon the eager ear!

The words of love that still each fear
And bring the sense of heaven near
So it must be old love bestows
Their worth, till treasure waxes

And from the few words the richer grow
From all the passion of the poet.

Captures Honors Again
Mlle. Odette Piau, the world's speed-typing champion, has again won the championship of the French Typing Academy at Royon, France, making the seventh successful time for her to capture the honors.

She averaged a speed of 90 words a minute copying unknown text and 120 words a minute from text with a routine over and over. She also won the regularity championship. Mlle. Piau became the world champion last October in Paris.

In Spain the traffic code forbids motorists to alight from the off side in traffic.

Rules For a Short Life
If Favored Chances Are Very Good For Success

To create the impression that you are a very busy man always speed up your "introduction."

When passing other cars pick out a suitable spot on a hill or curve. There's no fun in passing on the straightway.

Use only half the road, but be sure it's the middle half. Then you won't run over the edge.

Considerable time may be saved in driving out of alleys by stepping in the gas just before reaching the sidewalk.

Pay no attention to grade crossings. Let the engineer do the worrying. He gets paid for watching the right-of-way.

Don't wait for the green light. It will be along in a minute, and, anyhow, a red one will do in a pinch.

Before they were married she couldn't bear to let him out of her sight. She loved him so well. After they were married she couldn't bear to let him out of her sight. She knew him so well.

Magistrate: "You are charged with breaking a chair over your man's head." Prisoner: "I didn't mean to break the chair, your worship."

Little Helps For This Week

Prayer is a character builder. Men are influenced by their associates. If they talk with wise men they get wisdom from them, power from the greatest, gentleness from the kind, and sincerity from the humble. If men associate with God in prayer God will mould them. If we will spend time with Him, whether we are alone or in public places, he will work upon us and build Himself and His kingdom in us.—Robert B. Speer.

Now alibieth space, example, prayer, but the greatest of these is prayer.—St. Bernard.

"O Thou by whom we come to God, Thy Love, the Truth, the Way, The path of prayer Thyself has trod, Lord, teach us how to pray."

Great Contribution To Progress Of World
Art Of Printing From Movable Type
Man's Greatest Invention

In the midst of all the discoveries and inventions, it may not be generally known that the art of printing from movable type is perhaps the greatest invention ever devised by the mind of man. It provided the facilities for the giving of knowledge to the masses. Through the medium of books, pamphlets, newspapers and other forms of literature, knowledge previously in the hands of monks spread throughout the world.

To the mind of man it gave light where formerly darkness prevailed. It is almost impossible to estimate the progress that has been made in the world through this great invention.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum. Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

No Gypsy Royalty
Irving Berlin, the famous composer, New York, has punctured the belief that gypsies have kings and queens who arrange royal marriages and such. "Your child," says the professor, "spends his vacations among the Romanovs, said that the talk about gypsy royalty is 'an American fiction.' It is against the spirit of gypsies to have rulers, he said."

Portugal's agricultural prospects are the best in many years.

Easy Teething
"Baby got all its teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mr. Thomas Shaw, Hamilton, Ont. Some of other Mothers have written in similar vein.

BABY'S OWN TABLETS for teething trouble, upset stomach, sleep, colic, constipation, diarrhoea, or whenever he is cross, restless and fretful. Easy to take. Can be given at any time.

Send your order to the nearest drug store or to the following address: Write to: Dr. Williams' Pink Pills for Pale People, 100 N. 3rd St., New York, N.Y.

FOR SALE—125-Hushel Grain Tank,
New. Will sell cheap. Alex Reid. 26

Norman Runney returned to Carbon
last Friday night after spending the
past year or more in British Columbia.
Norman says that things are pretty
rough out in that neck of the woods
and that where he was they were only
paying twenty-five cents per day for
common work. At two and three dol-
lars a day here, this is most certainly
a land of milk and honey.

Mrs. Brooks came out from Calgary
last Thursday and spent a few days
visiting with her sister, Mrs. H. N. El-
lett.

Carl Moorhouse has purchased a new
Chevrolet truck to use on his cartage
line between Carbon and Calgary.

Hugh Brown, Harley Wilson, Wm.
Millman and Harold Edwards were
duck hunters around Stettler over the
week end. Their report fair luck.

Mrs. George Wilson, Licentiate of
Tunisia Conservatory of Music, for-
merly teacher of piano at the Wood-
stock College, has opened a studio for
the teaching of piano at the home
of Mrs. R.P. Torrance, Carbon. Those
interested please phone 45.

Miss Daphne Nash was a Calgary
editor on Sunday.

Myrtle Sherry is at the R.D. Barnes
farm for a few days during threshing.
Threshing has been delayed for al-
most a week due to wet weather, al-
though nearly every machine in the
district is now humming and the weath-
er is clear at the time of going to
press. There is considerable threshing
to be done in the district and some of
the wheat may be snowed in unless we
get fine weather from now on.

John Taylor, an old timer and now
living at Vernon B. C., visited friends
for a short time on Friday.

Mr. and Mrs. Chas. Dunsmore were
visitors at Bassett over the week end.
Wheat yields are still running high
in the district and many fields some
over the forty bushel mark. In the next
future The Chronicle will publish a
list of some of the larger yields and if
your own ones are 50 bushels or over,
containing field, we request that you
report it to The Chronicle so that we
may include it in the list. Mr. Elliott,
the local postmaster, will collect these
yields reports. Tell him of your heavy
yields.

Youthful Strength

Dr. Maxime Hirschfeld, the well-known authority on Bionology
and Director of the Institute of Social Science of Berlin, Germany,
created

TITUS PEARLS

to help the millions of men and women who have lost or are losing
their vital physical power. In his 35 years of practice and research,
however, he realized that the weakening of man's glands was also
responsible for other troubles! High blood pressure, hardening of
the arteries, physical exhaustion after work or exercise, dizziness,
depression, neurasthenia, etc.

All these troubles can be removed with Titus-Pearls. Numerous
men were treated by Dr. Hirschfeld in his Berlin Institute.
L. S. (State Official: 60 years old, married) complained of
physical exhaustion, dizziness and tremors. Was easily tired. Mental
powers dull and slow. After physical exercise had been incomplete
for previous 5 years. Blood pressure too high. Given 2 Titus-Pearls
3 times a day. 2 weeks later the medical report on this man was:
General health better, more vigor, dizziness much less and returned
to work. Treatment continued and 3 weeks later L. S. reported
again, this time to say that all weariness and exhaustion had, once
he felt fresh and buoyant. His blood pressure had fallen, and at 60
years of age he had regained his physical power and vitality that he
had known in the prime of his life.

Start retaining your youthfulness now! Today! In 2 weeks time
you will be aware of the new, vital force within you. Send \$5.00
each (cash realized or money-order) for 2 weeks treatment.
